**INFINITY BEVELS® . . .**  
 A modular system of "interlocking" bevels and bevel clusters.

The bevels are of highest quality 3/16" plate glass with precision ground 1/2" bevels. The line is shown on pages J10-J11 and consists of 3 different single bevels and 78 different bevel clusters.

The unique characteristic of Infinity® Bevels is that they are designed to match up one with another! All curves (both inside and outside) have the same 1-1/2" radius and fit neatly one into another. All clusters that end in straight line bevels are based on 1" wide bevels spaced 2" apart so they can match up with another straight line cluster. Since clusters end in straight 1" bevels, they are compatible with straight line Super Bevels™, so you have a wide range of lengths of finished bevels available to you for use in your designs.

As you can see, the possibilities are practically infinite . . .that's why it's called "Infinity".

**HERE ARE SOME HELPFUL HINTS ON HOW TO USE THE SYSTEM.**

While all clusters are designed to match-up with other clusters - many are designed to perform specific functions.

**HUBS** - the most versatile cluster since you can add to it in any of all of four directions.

**CORNERS & LINKS** - designed as part of continuous pattern and can be added to in two directions.

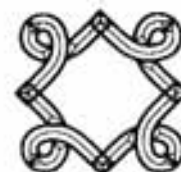

**CROWNS** - used either to continue a design or as a terminal end (only able to connect to other clusters at one end).

It is also possible to use clusters for more than one function. For example, a hub can be used as a corner - in which case three hubs provide bevels for four corners.

You can even miter bevels so they can be joined together in different ways.

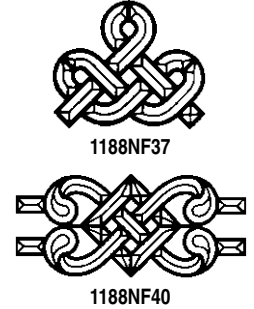

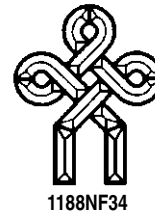

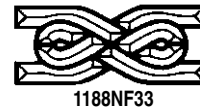

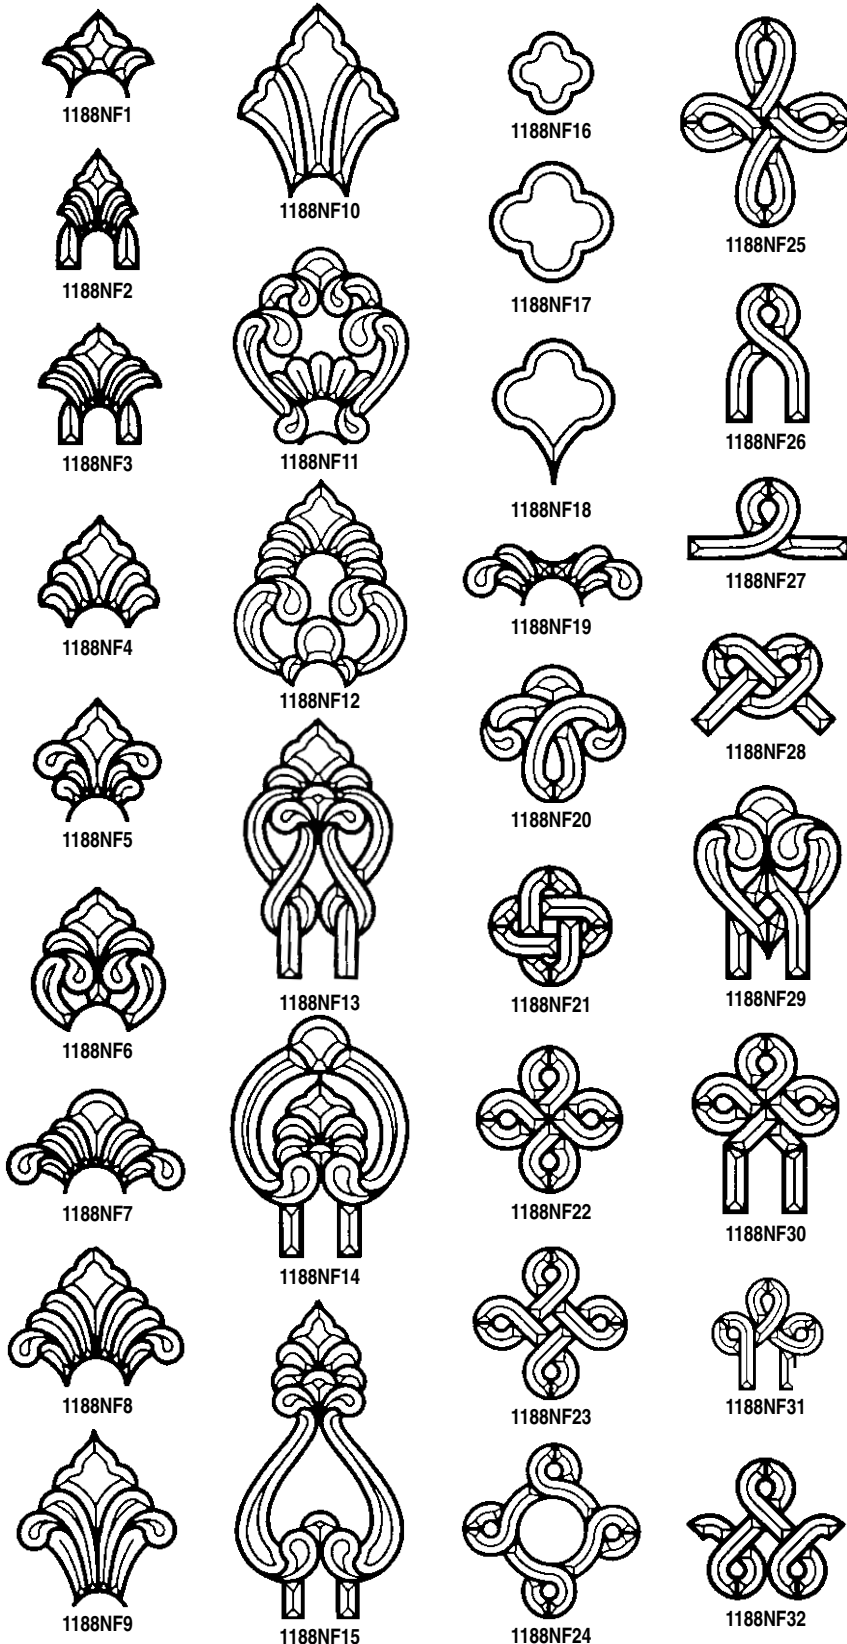

And, of course, you can combine other bevels from our **Super Bevel™** series into your design. **Infinity Bevels®** are as limitless as your imagination.

### INFINITY BEVELS®

An innovative and unique idea for bevel clusters! Each of the crystal clear clusters may be used alone, connected together or used with straight line bevels to create an infinite variety of designs. Every stained glass piece that incorporates Infinity Bevels® is impressive. Creative Craftsmen Co., Inc.

\* NF53 butts or matches up with a 1-1/2" straight line bevel.

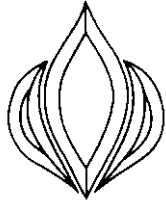

\* NF54 & 55 butt or match up with a 1" straight line bevel.

Registered U.S. Patent #5,045,370.

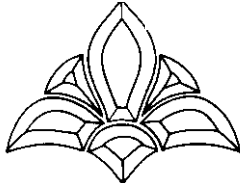

**C SERIES**

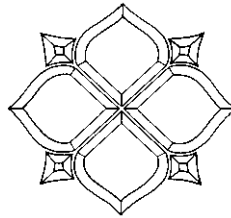

Smaller in size than the other series, this group of clusters is ideally suited for accents. They can be used to create striking designs. Each component of the beveled cluster is 3/16" (5mm) transparent glass, ground and polished to a uniform 1/2" (13mm) bevel. Dimensions indicated are for assembled bevel clusters using lead came. Compensation will be necessary if copper foil is used.

**J SERIES**

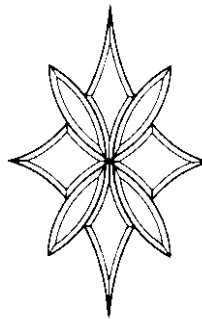

This series is well-suited for window panels. The beveled clusters may be framed out into circles, ovals, squares or rectangles. Many are available with an optional center motif. Each component of the beveled cluster is 3/16" (5mm) transparent glass, ground and polished to a uniform 1/2" (13mm) bevel. Dimensions indicate those of the assembled bevel clusters that use lead came. Compensation will be necessary if copper foil is used.

™1985 Creative Craftsmen Co., Inc., Warrenville, IL 60555

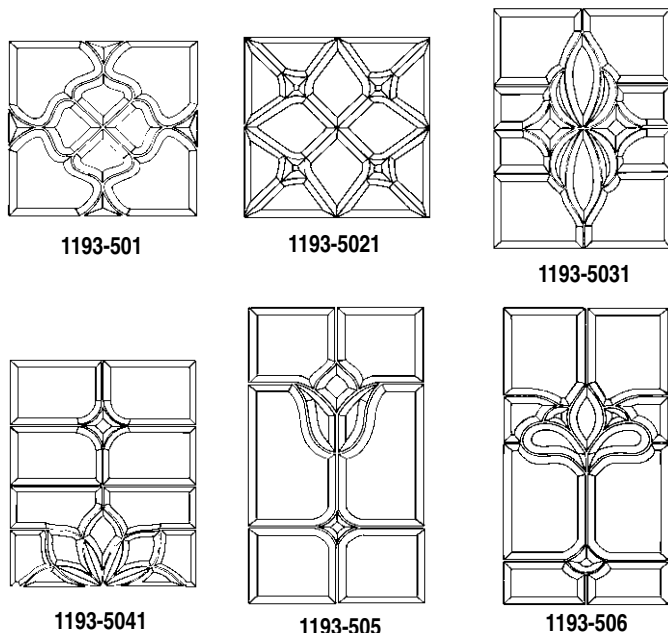

**PREMIER DOOR LITES**

Combine these beautiful bevel clusters with your selection of glass to create elegant entry lites. Each component of the beveled cluster is 3/16" (5mm) transparent glass, ground and polished to a uniform 1/2" (13mm) bevel. Dimensions are for assembled bevel clusters using lead came. Compensation will be necessary if copper foil is used. Patterns are not included.

**FULL PANEL BEVEL CLUSTER DESIGNS**

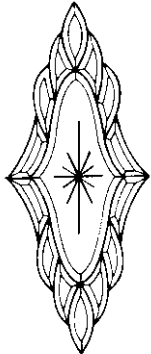

Pre-cut and unassembled. Available in 4 sizes and 6 designs. (The center designs can also be found in the C Series and J Series Beveled Clusters.) Dimensions are for assembled bevel clusters using lead came. Compensation will be necessary if copper foil is used. Each piece is pre-cut and fully beveled, making an excellent project for beginners. These panels are attractive and very marketable when assembled.

Cat. No. 1205-GST-28

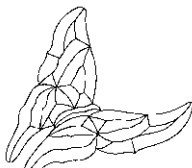

These Glassmith Studios Bevel Clusters are on 3/16" (5mm) glass with a 1/2" (13mm) bevel. Some clusters contain glue-chipped areas to create added depth. Several clusters are beveled colored glass. Create windows and panels using these exciting clusters or use them with designs from the Glassmith Studios books: *Northern Lights* (Cat. No. 70543), *Work in Progress* (Cat. No. 713502) & *A Break in Time* (Cat. No. 69061).

BEVEL SERIES DESIGNS

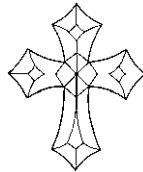

Carolyn Kyle does it again with the design of these brilliant festive bevel pieces. Detailed instructions for creating three-dimensional centerpieces and sparkling window adornments are included. These premium quality designs are 3/16" (5mm) glass with a 1/2" (13mm) bevel and highly polished to a brilliant sparkle. Sizes shown are approximates for completed clusters. Additional jewels or glass may be required to complete the clusters as shown.

### CUSTOM BEVELS

A custom beveling service is available for straight line or custom designed bevel clusters of glass and mirror. Price quotations will be submitted upon receipt of the following specifications:

- ❖ Bevel Width
- ❖ Thickness of Glass or Mirror
- ❖ Template or Drawing to Scale
- ❖ Quantity Desired

There may be some restrictions on shape and size of curves due to mechanical limitations.

### CLEAR GLASS BEVELS

Any thickness listed may be beveled to your requirements.

- ❖ 3/16" (5mm)
- ❖ 3/8" (10mm)
- ❖ 1/4" (6mm)
- ❖ 1/2" (12.7mm)

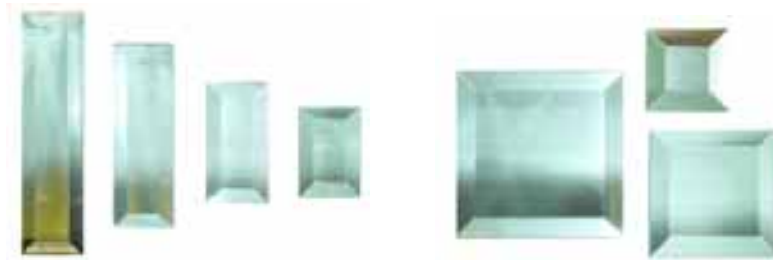

Bevel widths from 1/2" (12.7mm) to 1-1/2" (38mm) are offered.

There may be some restrictions on shape and size of curves due to mechanical limitations.

### GLUE CHIP BEVELS

Quality 3/16" (5mm) thick glue chip glass with a full 1/2" (13mm) bevel.

### MIRROR BEVELS

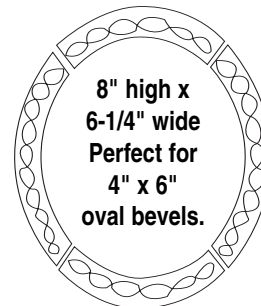

Silvered 3/16" (5mm) thick plate glass with a full 1/2" (13mm) bevel. Nominally 6mm thick. Compatible in cluster panels which are 3/16" (5mm) thick—both having a 1/2" (13mm) bevel.

1303-J20

Clear plate glass, 3/16" (5mm) thick. Bevels are 1/2" (13mm) wide. Edge thickness is approximately 1/16" (1.6mm) and may vary. Bevels cut well if necessary. Packaged in boxes of 30 bevels.

Cat. No.	Radius	
	Standard	Metric
1290-34	3" - 4"	76 - 101mm
1290-67	6" - 7"	152 - 178mm
1290-910	9" - 10"	229 - 254mm
1290-1213	12" - 13"	305 - 320mm
1290-1516	15" - 16"	381 - 406mm

**NOTE:** Radius dimensions given in the chart above indicate both the inside radius (first number) and also the outside radius (second number).

**Example: Cat. No. 1290-1516** (8 bevels) make a complete circle with an inside diameter of 30" and an outside diameter of 32". The difference between the numbers is the 1" width of the bevels times two - one bevel on each side. Each Cat. No. signifies one segment only.

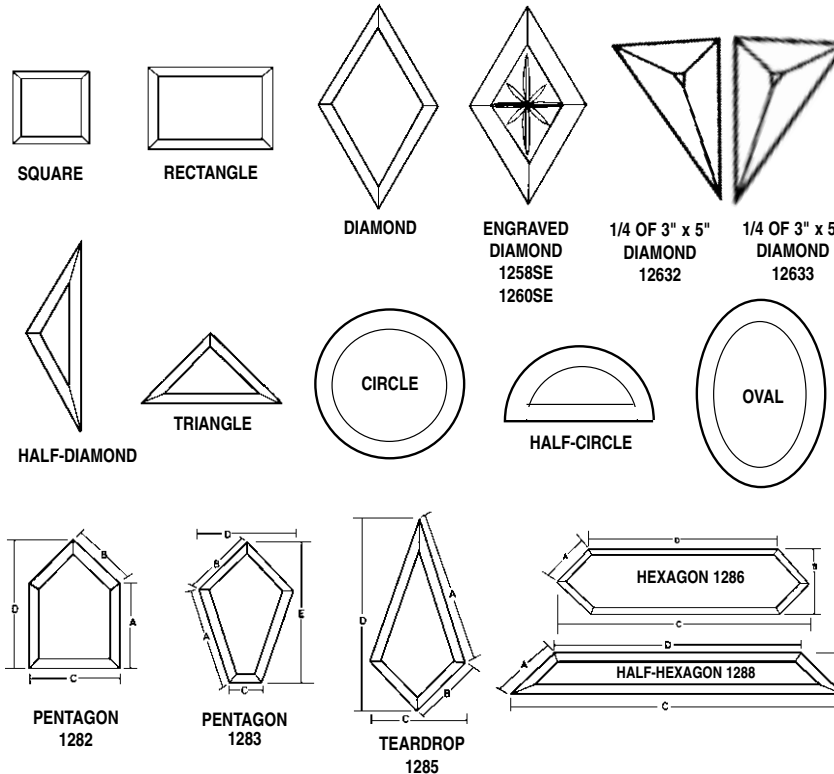

**ARC PENCIL BEVELS**

**Cat. No. 1290-**

For use with 1" (25mm) wide bevels from Infinity Bevel Systems®.

**NOTE:**

To make a SEMI-CIRCLE: Order 4 bevels.  
To make a FULL-CIRCLE: Order 8 bevels.

### VERSE INSCRIBED BEVELS

Hand-engraved on a 4" x 6" (102 x 152mm) oval bevel on 3/16" (5mm) clear glass, then screened with the indicated verse. Bevels are packaged on sturdy cardboard backing, shrink-wrapped with clear plastic and punched for wall display on hooks or racks. Made in the USA.

**NOTE:** Verses are screen printed. The ink is fired permanently on the glass, but is not guaranteed to withstand the electroplating process.

**FEMME FATALES**

Choose from 22 unique assembled bevel clusters ranging in size from 8-1/2" to 14-1/4".

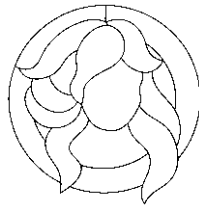

Each design is delicately assembled, foiled and soldered, then finished with a black patina. The thin firm round edge has loops and chain ready for hanging. Femmes Fatales were designed and produced for the fashion industry. However, we were able to obtain some for our customers at a vary attractive price. Once our stock is sold out, they will not be available again at our low offering price.
