COATINGS BY SANDBERG

Dichroic by CBS

Naming of Dichroic Colors is confusing since there is no industry standardization.

Coatings by Sandberg uses this system:

First name - straight through Transmitted Color (when coated on Black there is no transmitted color, only reflected color)

Name after slash - straight back Reflected Color

90° angle i.e. - color will "shift" toward the next above color

When fused or hotworked, the color will permanently shift toward the next above color.

The amount of shift must be experimentally determined by the artist.

JEWELERS PACKS

Four pieces splatter pattern random color dichroic glass. Each pack comes with a pre-fired cabochon made with the Splatter Dichroic coating. One strip in the pack is thin black glass (base layer) and the other three strips are thin clear.

- 4956SM-96 (4 3/8" x 7" strips)**
- 4956SM-90**
- 4956MD-96 (4 1/2" x 7" strips)**
- 4956MD-90**
- 4956LG-96 (4 1" x 7" strips)**
- 4956LG-90**

DICHROIC COPPER FOIL

New Dichroic copper foil is 1/2 the cost of dichroic glass, non COE specific (use with any glass type), Doesn't need to be pre-heated- the coating jumps off the copper and attaches to molten glass when marvering. It's three times as thick as regular Dichroic coatings and it's beautiful silver color has various rainbow hues. Sheet size: 6" x 12".
Order as: 49596

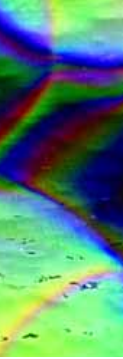

DICHROIC COATED CLEAR FRIT

Uroboros 'coarse' size frit. Includes 2 ounces frit 3/4" diameter, 8" long tube. Available 90 or 96 COE glass. Ask about available colors. Specific colors can be special ordered.

- 11164-965** Dichroic on 96 Clear Coarse Frit
- 11164-905** Dichroic on 90 Clear Coarse Frit
