Sheet Thickness: 3/64" (1mm).

DIAMANT CRYSTAL CLEAR GLASS

SGG Diamant is a high quality clear float glass with exceptional clarity and high light transmission. Often called "low-iron" or "extra white" because it does not have the dark green tint characteristic of ordinary clear float glass when viewed from the edge. SGG Diamant transmits up to 92% of visible light, depending on thickness. It is especially suitable in applications where high visual clarity and minimal color distortion is required such as display cabinets or art glass creations. SGG Diamant is available in the following thicknesses: 6mm (1/4"), 10mm (3/8"), 12mm (1/2"), 19mm (3/4"). It is similar to Starphire by PPG, Optiwhite and Krystal Klear by AFG. SGG Diamant is a trademark of Saint-Gobain Glass.

- Cat. No. 120401 - 12 x 24 x 3/4" Sheet
- Cat. No. 120402 - 12 x 12 x 3/4" Sheet
